**Julia Roig, President of PartnersGlobal**, represents the next generation of leadership in the international development field as the President of one of the most preeminent global organizations dedicated to innovative governance solutions for development. **PartnersGlobal** (Partners) believes that good governance and change management are the underpinning of all development challenges, and has a successful track record of building civil society and broad partnerships to effect democratic change. **Partners** is a leader in the field of *Sustainable Impact Investment* and has successfully invested in local *Centers for Change Management* throughout the world with a focus on social entrepreneurship for civic engagement. Together with these affiliate Centers, **Partners** supports local leaders to collaboratively address a myriad of issues such as citizen security, natural resource management, education reform, health care and anti-corruption. As President, Julia Roig has solidified private sector partnerships to reach development goals, in particular a long-standing global relationship with General Electric in over 10 countries. In addition, Ms. Roig has spearheaded linkages with entertainment and advertising industry leaders to support peacebuilding efforts, most recently pro bono campaigns to support the peace talks in Colombia and to combat polarization in Europe. Julia is the main architect of a new initiative on *Narratives for Peace* with the Alliance for Peacebuilding, building a multi-sector platform for collaboration amongst professional peacebuilders and our allies to engage with peace narratives.

Ms. Roig provides technical and strategic leadership within the global network of affiliate Centers and represents the organization within the foreign assistance community with a personal commitment to multi-lateralism and global cooperation. During her tenure, she conceived of and oversaw a three-year global evaluation of the **Partners**' investment model in local Centers. The final report released in 2014 has made a substantial contribution to learning in the international development field, including: authentic international and local partnerships, sustainable investment in local capacity, and long-term impact on democratic governance.
